

### 3-11 总结嵌套的for循环

所谓嵌套循环就是在for循环里面再做for循环。

```
for i in range(9):  
    for j in range(8):  
        print("jjjj内层循环:", j)  
        print("iiii外层循环:", i)
```

```
my_sisongwei x  
C:\Users\user\Envs\django1.1\Scripts\pyth  
jjjj内层循环: 0  
iiii外层循环: 0  
jjjj内层循环: 1  
iiii外层循环: 0  
jjjj内层循环: 2  
iiii外层循环: 0  
jjjj内层循环: 3  
iiii外层循环: 0  
jjjj内层循环: 4  
iiii外层循环: 0  
iiii内层循环: 5
```

可以上述代码可以看出。按照python执行代码的顺序，外层循环执行一次内层循环会把元素从0执行到结束再继续往下执行。
